# TA31 

## series

## Product Segments

## - Care Motion

The TA31 is one of our great medical grade linear actuators. It can lift up to 8000 N and its IP rating is up to IP66W. The TA31 is a high quality solution for medical applications such as medical beds, medical chairs, or home care options.

## Note

1 Please refer to the approved drawing for the final authentic value.
2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.

3 The current \& speed in table are tested with 24 V DC motor. With a 12 V DC motor, the current is approximately twice the current measured in 24 V DC; speed will be similar for both voltages.
4. The current \& speed in table are tested when the actuator is extending under push load.

5 The current \& speed in table and diagram are tested with TiMOTION control boxes, and there will be around $10 \%$ tolerance depending on different models of the control box. (Under no load condition, the voltage is around 32 V DC. At rated load, the voltage output will be around 24 V DC)

6 Standard stroke: Min. $\geq 25 \mathrm{~mm}$, Max. please refer to below table.
