I. ABOUT US

RAVEO s.r.o. operates on the Czech and Slovak market where it offers components for propulsion technology. We focus on industrial applications where motion and positioning are required. We provide to our customers technical consultations, optimal design and after-sales service. Also we offer products from renowned manufacturers and also complete solutions with respect to the surrounding technology. Product offer includes mechanical and electrical components such as electric motors, gears, mechanical lines or frequency inverters.

RAVEO employees have many years of experience in industrial automation and have many certifications and courses. Our customers appreciate first of all expertise, professionalism and human approach.

II. CONDUCT OF BUSINESS

RAVEO s.r.o. is a supplier of power engineering for industrial applications. The company's product portfolio can be divided into four major product lines, each of which is composed of different lengths and depths of the respective assortment. The basic product division is as follows: electric motors, transmissions, linear technology, control.

Our products can be used in almost any area - Automotive, Healthcare, Engineering and Manufacturing, Aerospace, Robotics and Special Applications or Smart Households.
